CNATRA INSTRUCTION 1542.169

Subj: T-45C NATOPS INSTRUCTOR UNDER TRAINING (IUT) CURRICULUM

1. Purpose. To publish the curriculum for training Instructor NFOs and Pilots in the NATOPS phase of Naval Air Training Command (NATRACOM) flight training.
2. Cancellation. CNATRAINST 1542.160 and CNATRAINST 1542.174 (NATOPS stage) will be cancelled when the last enrolled IUT completes the curriculum.
3. Action. This instruction is effective on receipt. No changes will be made without the written authorization by the Chief of Naval Air Training (CNATRA).
4. Forms. The CNATRA forms required by this instruction are automated in the Training Integration Management System (TIMS) computer program. Additional CNATRA forms are available on the CNATRA website <https://www.cnatra.navy.mil/pubs/forms.htm>.

COURSE DATA

1. Course Title. T-45C NATOPS Instructor Under Training (IUT) Curriculum.
2. Course ID Number (CIN)  
  
T-45C NATOPS IUT (TW1,TW2) - Pilot: Q-2A-0169  
T-45C NATOPS IUT (TW6) - Pilot: Q-2D-0169  
T-45C NATOPS IUT (TW6) - NFO: Q-2D-1169
3. Location. Naval Air Station Kingsville, TX; Naval Air Station Meridian, MS; Naval Air Station Pensacola, FL.
4. Course Status. Active.
5. Course Mission. The T-45C NATOPS IUT Curriculum is designed to provide Pilots and NFOs with an initial NATOPS qualification or re-qualification and familiarization of the T-45C aircraft. This syllabus does not result in a Flight Instructor qualification. Successful completion of this curriculum is a prerequisite for follow on training and designation as a T-45C Instructor Pilot or Instructor NFO in either Strike Pilot or Advanced NFO training phases. This course will require:
  - a. Flight training to teach normal and emergency NATOPS procedures and aircraft familiarization.
  - b. Ground training to supplement and reinforce flight training.
6. Prerequisite Training
  - a. Designated U.S. Navy, Marine, Coast Guard, Air Force, and foreign military aviators (Pilot or Naval Flight Officer).
  - b. Swim/Physiology Class I, if required per 3710.7U guidance (prior to flight in the aircraft).
7. Security Clearance Required. None.
8. Follow-on Training. As required to maintain annual NATOPS currency IAW OPNAVINST 3710.7U.

9. Course Length. Overall time-to-train calculated in accordance with CNATRAINST 1550.6E. Training days account for factors including weather, personnel and equipment availability, briefing and preparation time, and historical delays. Calendar weeks further account for weekends, holidays, safety stand-downs, and other expected nonworking days.

	<u>Training Days</u>	<u>Calendar Weeks</u>
a. TW-1 Pilot NATOPS Initial Qualification	28.1	6.2
b. TW-2 Pilot NATOPS Initial Qualification	27.6	6.1
c. TW-6 Pilot NATOPS Initial Qualification	33.3	7.4
d. TW-6 NFO NATOPS Initial Qualification	25.9	5.7

10. Class Capacity. Variable.

11. Instructor Requirements. As determined by Chief of Naval Operations (CNO) planning factors.

12. Course Curriculum Model Manager. Commander, Training Air Wing Two (COMTRAWING TWO).

13. Quota Management Authority. Chief of Naval Air Training.

14. Quota Control. Chief of Naval Operations.

15. Course Training Subjects

a. Ground Training

<b>ADMINISTRATION (PILOT and NFO)</b>		
<b>Stage</b>	<b>Symbol</b>	<b>Hours</b>
Administration/Check-in	G0101	4.0
Administration/Check-out	G0106	2.0
<b>Total</b>		<b>6.0</b>

<b>GROUND TRAINING (PILOT and NFO)</b>		
<b>Stage</b>	<b>Symbol</b>	<b>Hours</b>
Administration/Ground Training	G0102-5	4.0
NATOPS Refresher Ground Training*	G0201-3	4.5
Crew Resource Management	G0204	2.0
Operational Risk Management*	G0205	2.0
Engineering	ENG0101-28	33.2
Aerodynamics	AER0101-6	2.5
Instrument Navigation	NAV0101-8	2.25
<b>Total</b>		<b>50.45*</b>

\*Optional events accomplished if required by NATOPS.

b. Flight Support

<b>FLIGHT SUPPORT (PILOT and NFO)</b>		
<b>Stage</b>	<b>Symbol</b>	<b>Hours</b>
Emergency Procedures	EP1101-11	7.9
Cockpit Orientation	CO1101-5	2.0
Familiarization Flight Procedures	FAM1101-2	2.0
Familiarization Flight Procedures Exam	FAM1103	1.0
Night Fam Flight Procedures	NFM1101-2	1.0
Night Fam Procedures Exam*	NFM1103	1.0
OCF Procedures	OCF1101-2	2.0
NATOPS Examinations	NA1101-2	4.0
Section Formation Flight Procedures	FRM1101-5	2.0
Formation Exam I*	FRM1106	1.0
<b>Pilot Total</b>		<b>23.9</b>
<b>NFO Total</b>		<b>21.9</b>

\* Exams NFM1103 and FRM1106 apply to Pilots only.

c. Flight/Simulator Training Summary. The programmed times for each phase, stage, and media are:

<b>PILOT NATOPS IUT FLIGHT TRAINING</b>				
<b>Flight/Events</b>	<b>OFT</b>		<b>T-45C Dual</b>	
	<b>Flts</b>	<b>Hrs</b>	<b>Flts</b>	<b>Hrs</b>
NA	9*	13.2	11**	13.5
<b>Totals</b>	9*	13.2	11**	13.5

\* Includes optional NA3690 NATOPS Instrument Check not required for NATOPS qualification.

\*\* Includes optional NA4790 NATOPS Instrument Check Flight not required for NATOPS qualification.

<b>NFO NATOPS IUT FLIGHT TRAINING</b>				
<b>Flight/Events</b>	<b>OFT</b>		<b>T-45C Dual</b>	
	<b>Flts</b>	<b>Hrs</b>	<b>Flts</b>	<b>Hrs</b>
NA	7	10.5	7	8.5
<b>Totals</b>	7	10.5	7	8.5

16. Training Preparation Time. In addition to the hours formally planned for classes, simulators, and flights, significant additional time to prepare and study should be expected outside of scheduled training hours. This range will vary depending on the complexity of the material and individual student needs, and may be up to several hours per event. For simulator and flight events, specific brief and taxi times will be programmed into TIMS and accounted for on the flight schedule, per the following table:

<b>ADDITIONAL FORMAL TRAINING TIME PER CURRICULUM HOUR/EVENT</b>			
<b>Training Area</b>	<b>Brief/Preflight/Taxi</b>	<b>Taxi/Debrief</b>	<b>Total</b>
Simulator (CSI)	0.50	0.50	1.00
Flight (IP)	1.5	1.00	2.5

17. Physical Requirements. As specified in Chapter 15 of the Manual of the Medical Department (NAVMED P-117) and all applicable anthropometric standards.

18. Obligated Service. Refer to MILPERSMAN for Naval personnel.

19. Primary Instructional Methods. Lecture, computer-assisted instruction (CAI), self- and group-paced study, simulator, and in-flight instruction.

20. Preceding Curriculum Data. This curriculum replaces the NATOPS Stages of CNATRAINST 1542.160 and 1542.174.

21. Student Performance Measurement/Application of Standards. The standards outlined in Chapter IX, Course Training Standards, are used to evaluate student performance for all items on all events. Final judgment regarding the satisfactory performance of any flight maneuver rests with the NATOPS Instructor (NI). Refer to CNATRAINST 1500.4H, Chapter VII, for further guidance.

22. Summary of Lead Overhead. The Summary of the Instructor Lead planning factor hours for the T-45C NATOPS IUT is tabulated below. The tables are a compilation of events requiring Instructor Lead that can be found in Chapter III of this publication.

<b>NATOPS IUT</b>				
<b>Flight/Event</b>	<b># Events</b>	<b>Lead Hrs/Event</b>	<b># IUT per Lead</b>	<b>Total Lead Hrs/IUT (# events x hrs/event)</b>
NA43	1	1.4	1	1.4
<b>Totals</b>	<b>1</b>	<b>1.4</b>	<b>1</b>	<b>1.4</b>

23. Additional CSI Resource Requirements. None.

ABBREVIATIONS

The following is a list of abbreviations used in the curriculum:

ASR	-	Airport Surveillance Radar
ATF	-	Aviation Training Form
ATS	-	Aviation Training Summary
BAR	-	Basic Airwork Recognition
BAW	-	Basic Airwork
CAI	-	Computer-Assisted Instruction
CNATRA	-	Chief of Naval Air Training
CRM	-	Crew Resource Management
CTS	-	Course Training Standards
EOB	-	End of Block
EP	-	Emergency Procedure
FAM	-	Familiarization
FFP	-	Familiarization Flight Procedures
FLIP	-	Flight Information Publication
FPC	-	Final Progress Check
FTI	-	Flight Training Instruction
GCA	-	Ground-Controlled Approach
IAW	-	In Accordance With
IFR	-	Instrument Flight Rules
IGS	-	Instrument Ground School
INAV	-	Instrument Navigation
IP	-	Instructor Pilot
IPC	-	Initial Progress Check
ITF	-	Instructor Training Form
IUT	-	Instructor Under Training
MCG	-	Master Curriculum Guide

MIF - Maneuver Item File  
MIL - Mediated Interactive Lecture  
MOA - Military Operations Area  
NATOPS - Naval Air Training and Operating Procedures  
Standardization  
NFO - Naval Flight Officer  
NOTAMS - Notices to Airmen  
OCF - Out-of-Control Flight  
OCFFP - Out-of-Control Flight, Flight Procedures  
OFT - Operational Flight Trainer  
OPNAV - Office of the Chief of Naval Operations  
PAR - Precision Approach Radar  
SERGRAD - Selectively Retained Graduate  
SI - Standardization Instructor  
SOP - Standard Operating Procedure  
SSR - Special Syllabus Requirement  
TACAN - Tactical Air Navigation  
UHF - Ultra High Frequency  
UNSAT - Unsatisfactory  
VFR - Visual Flight Rules  
VHF - Very High Frequency  
VMC - Visual Meteorological Conditions

GLOSSARY

1. Advancing X. Completed event within the normal syllabus flow. Excludes events with last characters in the range 84-89.
2. Aviation Training Summary. A tabular sheet listing the MIF and maneuver grades within a training stage.
3. Block of Training. A sequential series of lessons within a training stage sharing an identical MIF. The second numerical character in the lesson designator identifies a block.
4. Check Ride (SXX90). A check in any stage of training.
5. Contact. The chapter of training that combines flight familiarization and visual navigation procedures.
6. Course of Training. The entire program of preflight, flight, simulation, academics, and officer development conducted in all media during the programmed training days.
7. Course Training Standard (CTS). A description of required behaviors and standards of performance for a specific maneuver. These standards are in Chapter IX.
8. Courseware. The technical data, flight training instructions, audio, video, film, CAI, instructor guides, student study guides, and other training material developed to support and implement the syllabus of instruction.
9. Critical Item. Any maneuver coded with a plus sign (+). This symbol indicates the maneuver is required and must be accomplished to the specified standard in that block of training.
10. Emergency Procedure. Any degradation of aircraft systems or flight conditions requiring crew action or intervention.
11. End of Block. Last event in block. In order to progress past EOB, the IUT must meet or exceed MIF on all critical items, and all optional items attempted, in the block.

12. Flight Training Instruction. A CNATRA-approved manual describing flight procedures and techniques for each training stage.
13. Hours per X. The average length for each event in a block, rounded to the nearest tenth of an hour.
14. Instructor Training Form. A grade sheet documenting IUT performance for all categories of training regardless of media, phase, or stage.
15. Lesson Designator. All syllabus events have a five-character lesson designator in the following format:

Char	Meaning	Remarks
1 <sup>st</sup>	Stage	AER-Aerodynamics CO-Cockpit Orientation ENG-Engineering EP-Emergency Procedures FAM-Familiarization FRM-Formation G-Ground NA-NATOPS NAV-Instrument Navigation NFM-Night Familiarization OCF-Out-of-Control Flight
2 <sup>nd</sup>	Media	0-Ground Training 1-Academics/ Flt Support 2-Not Used 3-OFT Trainer 4-Aircraft
3 <sup>rd</sup>	Block	Sequential, indicating block within stage.
4 <sup>th</sup> & 5 <sup>th</sup>	Event/Check identifier	Sequential, indicating event within block, or other event types as shown below: 84-Adaptation Flight 85-Practice Sim 86-Warmup 87-Extra Training 88-Initial Progress Check 89-Final Progress Check 90-Check Ride/Exam

Note: In a seven-character lesson designator, the alphanumeric characters represent the Stage and the four digits after the Stage identifier are in the same format as the 2<sup>nd</sup>-5<sup>th</sup> characters in a five-character lesson designator.

16. Maneuver Item File. A listing of required maneuvers and associated proficiency levels for each block of training.
17. Master Syllabus. Chapters I-VIII list all training syllabus activities, prerequisites, and desired training flow for T-45C NATOPS IUT.
18. Special Syllabus Requirement. One-time, ungraded demonstration item.
19. Stage of Training. All training of a particular type (Ground, NATOPS, etc.) within a phase. The alphanumeric letter(s) in the lesson designator identifies the stage of each lesson (For example: NA4101 is in the NATOPS Stage).
20. Standardization Instructor. The Squadron Commander will designate NATOPS/Standardization Instructors (SIs) for each stage. Qualified Instructors in this syllabus are herein referred to as "Instructor". Refer to local FIST instruction for NATOPS/Standardization Instructor qualification and designation requirements.
21. Training Media. The media for this syllabus include aircraft, T-45C OFT, MIL, Lecture, and CAI. The first numerical character in the lesson identifier designates the training media. (Example: CO1101 and EP1101 are academic events).
22. Training Review Board. A fact-finding board appointed to conduct an administrative review of circumstances and procedures relative to an FPC recommendation for an IUT's elimination.

CNATRAINST 1542.169  
27 Jan 2016

BLANK PAGE

## Chapter I

### General Instructions

#### 1. Syllabus Management

- a. Distribution. Participating squadron personnel.
- b. Interpretation. The syllabus is directive. Should circumstances create situations not covered within the scope of this syllabus, or course of action appears to conflict with other directives, consult CNATRA (N71).
- c. Deviations. Document all deviations on the event's ATF.
- d. Changes. Recommended changes shall be submitted IAW CNATRAINST 1550.6E.
- e. Syllabus Description. The syllabus is divided into stages; the stages are grouped by like-flight training regimes, such as Engineering, OCF, and NATOPS. Each stage is subdivided into training blocks. The training blocks consist of a specified number of events. Course Training Standards are modified by the MIFs to identify the acceptable level of performance that must be achieved at the completion of each training block.

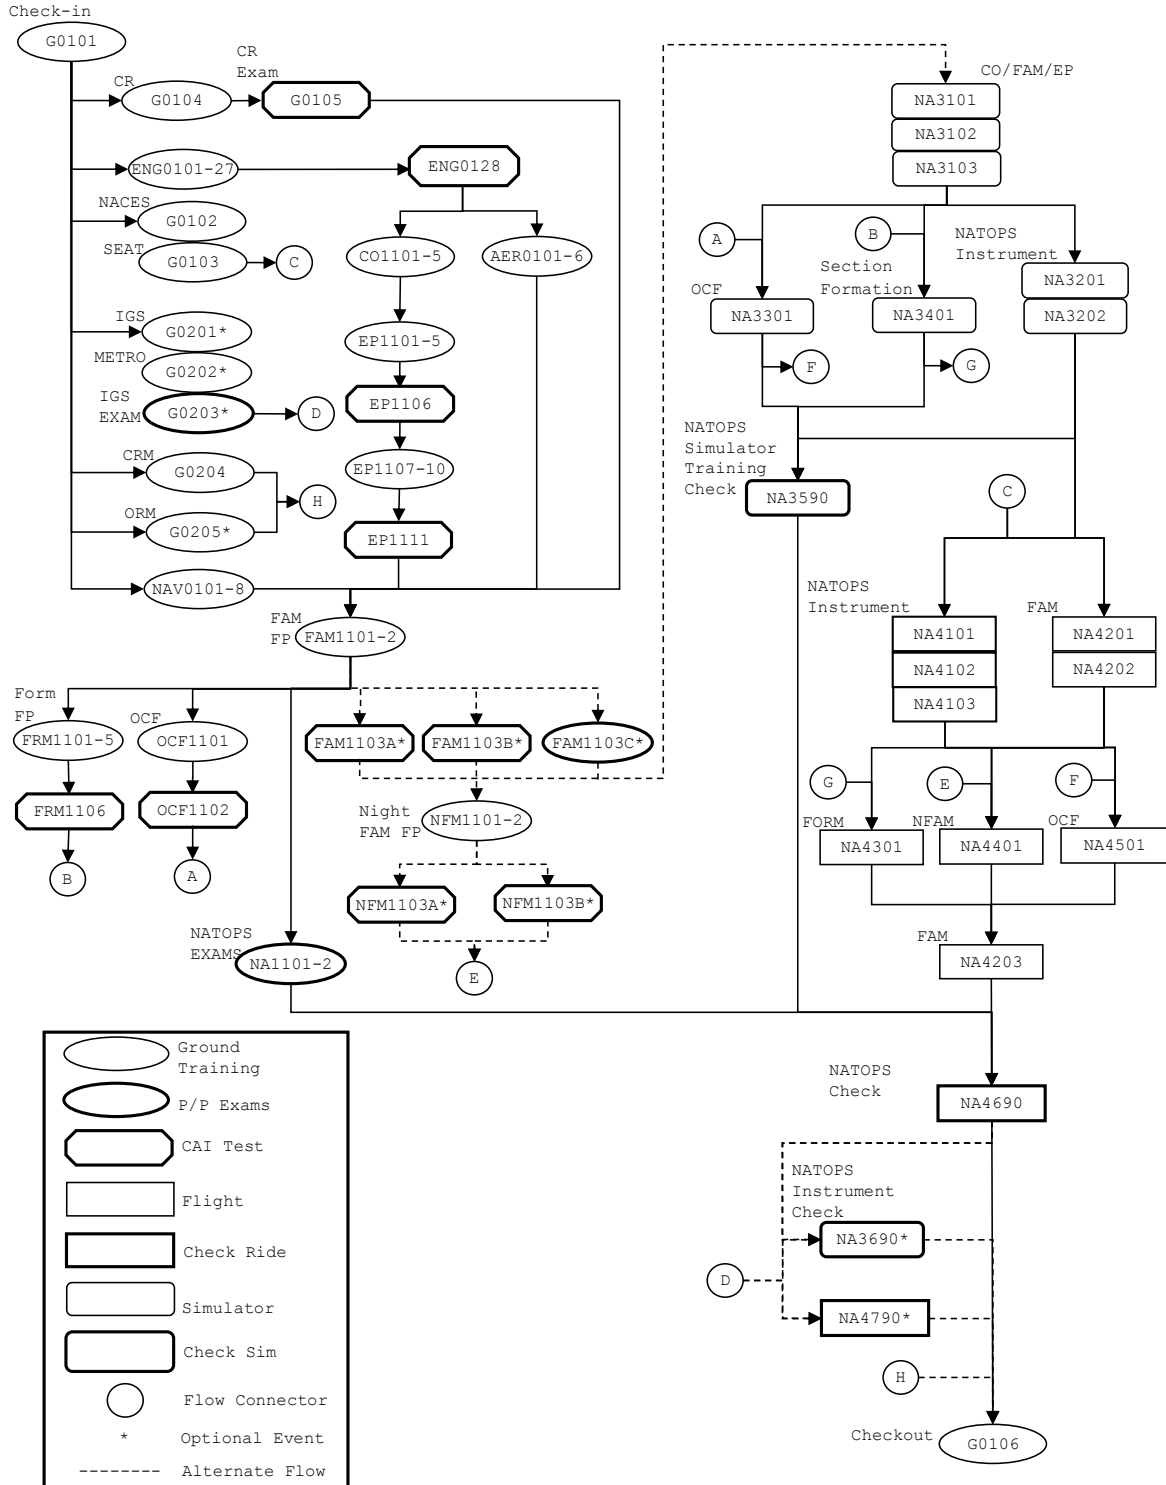

#### 2. Training Management

- a. Syllabus Progression. Fly events within each stage sequentially, except as noted. Do not start a block without all prerequisites. The flowcharts on pages I-3 through I-5 delineate the sequence of flying events and their ground training prerequisites. System training management is designed to facilitate two graded events (flight, simulator, or exam) per IUT per day.
- b. Maneuver Continuity. IUTs must accomplish previously introduced maneuvers frequently enough to ensure maintaining required proficiency.

**T-45C PILOT NATOPS IUT COURSE FLOW**

CNATRAINST 1542.169  
27 Jan 2016

BLANK PAGE

**T-45C NFO NATOPS IUT COURSE FLOW**

c. H/X. Instructors shall plan and execute missions to meet H/X as closely as practical. If actual event length varies from H/X by more than 0.3 hours, annotate reason(s) in ATF's general comments section.

3. Ground Training and Briefing Requirements, Mission Preparation, Briefings, and Debriefings

a. EOB Events. The instructor shall carefully review the ATS in planning the EOB event to ensure the profile includes opportunities to reach MIF on all critical and optional items attempted in the block.

b. Preparation. The IUT shall arrive for each flight with:

(1) Thorough knowledge of:

(a) Discuss items, as listed in Chapter III.

(b) Procedural knowledge of the critical and optional items for the event's training block.

(2) A flight profile tailored to training requirements, weak areas, and continuity.

(3) The latest ATS for the stage.

c. Briefing. Thoroughly cover the mission's:

(1) Discuss items, as listed in Chapter III.

(2) Specific objectives.

(3) Techniques and required procedures for accomplishing those objectives.

(4) NATOPS briefing requirements, planned profile, contingencies, and ORM considerations.

d. Debriefing

(1) After each event, the instructor shall critique the IUT's performance using cause/effect analysis, particularly with respect to the CTS.

(2) The mission's complexity and IUT's progress will govern the time required for the debrief.

(3) The instructor shall provide a copy of the event's ITF.

#### 4. Mission Grading Procedures and Evaluation Policies

a. General Grading and Evaluation Policy. Course Training Standards listed in this instruction and the MIFs are minimum stage/phase completion standards per maneuver. CTS/MIFs are designed to allow for minimum performance in a specific area with the understanding that performance above the minimum CTS/MIF will offset the weak area.

##### b. Grading Procedures (Aircraft and Training Devices)

###### (1) Overall Grading

(a) The overall grade for all flight and device events, with the exception of the NATOPS Check Ride, will be pass/fail.

(b) The overall grade for the NATOPS Check Ride (NA4690) will be UQ, CQ, or Q as described below:

1. Unqualified (UQ Level) - Fails to meet minimum acceptable criteria and needs supervised instruction.

2. Conditionally Qualified (CQ Level) - Meets minimum acceptable criteria and is safe to fly as the Mission Commander.

3. Qualified (Q Level) - Displays good knowledge of operational procedures and a thorough understanding of the aircraft.

(2) NATOPS Maneuver Grading. During the NATOPS phase of training, grading will be IAW NATOPS standards.

Judge the IUT's or student's proficiency only against the item's CTS or NATOPS grading criteria. The grading scale will be per the NATOPS as listed below:

- 5 = Not applicable to NATOPS Block Training
- 4 = Q
- 3 = CQ
- 2 = UQ
- 1 = Demonstrate

(3) Absolute Maneuver Grading. Use the following grading scale to document the IUT's characteristic performance on maneuvers attempted during each event. This is an absolute grading scale. Judge the IUT's proficiency **only** against the item's course training standard. Maneuver grades shall be consistent with ATF comments.

(a) Demonstrated (D/1 Level). Enter "No Grade."

1. When the instructor demonstrates the maneuver and the IUT does not subsequently perform it during the event.

2. To indicate accomplishing SSRs. Specify the completed SSRs in the ITF's SSR comments section.

(b) Unqualified (U/2 Level). Performance is unsafe or lacks sufficient knowledge, skill, or ability. Deviations greatly exceed CTS, significantly disrupting performance. Corrections significantly lag deviations or aggravate the deviation.

(c) Conditionally (C/3 Level). Performance is safe, but with limited proficiency. Deviations exceed CTS, detracting from performance. Corrections noticeably lag deviations, and may not be appropriate.

(d) Qualified (Q/4 Level). Characteristic performance is within CTS. Deviations outside CTS are allowed, provided they are brief, minor, and do not affect safety of flight. Corrections must be appropriate and timely.

(e) Excellent (E/5 Level). Not applicable to NATOPS training.

(4) Progression Rule. Performance must meet MIF by the EOB. IUT shall maintain or exceed MIF performance from one block, stage, or media to the next.

(5) Maneuver Requirements. For each block:

(a) Critical Items. Items with a number and a plus (+) are mandatory and must meet the required proficiency by EOB. When a maneuver is performed multiple times in a block of training, the last grade assigned for the maneuver will determine if the IUT meets EOB MIF.

(b) Optional Items. Items with a number, but without a plus (+), are optional; however, if flown, they must meet the required EOB proficiency the last time the maneuver is graded in the block.

(6) Incomplete Events. If an IUT has had ample opportunity to learn a task and subsequently flies a short mission, do not incomplete the mission solely to provide unwarranted extra training. Assess the event complete if:

(a) Seventy-five percent of the event's H/X were used for training, and

(b) Sufficient events remain in the block to redress the imbalance, and

(c) Individual maneuvers can still be accomplished within the block.

(d) Otherwise, assess the event incomplete.

(7) Completion Events. An event may both complete a previous event and count as an advancing X.

(8) Trainer Event Completion. Assess a trainer event complete if the IUT has received a full 1.5-hour training period.

c. Policies for Evaluation Flights and Ground Evaluations

(1) Check Rides (SXX90). Check rides amount to single-event training blocks; therefore, all rules regarding progressing out of a block apply, except as noted below:

(a) Should fly a representative cross section of optional maneuvers.

(b) The entire event should be devoted to assessing the IUT's ability to safely fly the aircraft. All maneuvers indicated with a plus (+) are check ride critical and must be accomplished to MIF.

(c) The IUT should be able to demonstrate required levels of proficiency without instructor assistance; however, instruction is allowed on check rides and IUTs may reattempt maneuvers at the instructor's discretion.

(2) Incomplete Check Ride. The check ride shall be incomplete when:

(a) Any critical (+) item was not flown, or

(b) The instructor was unable to sample sufficient examples of a given maneuver to assess the IUT's overall performance.

Note: The subsequent flight need only include maneuvers required to complete the check.

(c) Exceptions: The check is complete and the overall grade is UNSAT if:

1. Any critical item is below MIF, or

2. Any maneuver is U/2.

5. Special Instructions and Restrictions

a. Schedule Limitations. Schedule limitations for IUTs will be left to the discretion of the Instructor Training Unit (ITU) or cognizant squadron, but consistent with the provisions of OPNAVINST 3710.7U.

b. Deviations from Standard Maneuvers. All IUT flights will be conducted in accordance with the current T-45C NATOPS/Technical Orders, FTIs, and local SOPs. No deviations from standard maneuvers are authorized except in cases of emergency.

c. Minimum IUT Turn-Times. Minimum turn times are at the discretion of the instructor and IUT, and IAW local SOP.

d. Crew Day. Crew day and flight hour limitations are established by OPNAVINST 3710.7U and applicable NATOPS.

e. Crew Rest. Crew rest limitations are established by OPNAVINST 3710.7U and applicable NATOPS.

f. NATOPS Qualification Requirements. Completion of the NATOPS Check Ride as described in this instruction meets the NATOPS qualification requirements for the T-45C aircraft.

g. Previous Experience or Demonstrated Ability. This syllabus is designed to provide the IUT with at least the minimum flight time required for NATOPS qualification. Refer to T-45C NATOPS manual for qualification and currency requirements. For initial NATOPS qualification, no portion of the syllabus may be waived with exception for SER Graduates (see below).

h. SERGRAD. A shortened syllabus is provided for SER Graduates due to recent flight experience in the T-45C. Minimum events required for SER Graduate NATOPS qualification are:

- (1) G0102-5 (NACES, Ejection Seat, CR, CR Exam).
- (2) ENG0127-28 (Engineering Review and Exam).
- (3) G0201-5 (IGS, METRO, IGS Exam, CRM, ORM).
- (4) EP1101-11 (Emergency Procedures).
- (5) OCF1101-2 (OCF Procedures).
- (6) NA4201 (Familiarization Flight).
- (7) NA3301 (OCF Simulator).

CNATRAINST 1542.169  
27 Jan 2016

- (8) NA4501 (OCF Flight).
- (9) NA4101 (Instrument Flight).
- (10) NA3590 (NATOPS Simulator Check).
- (11) NA1101-2 (NATOPS Exams).
- (12) NA4690 (NATOPS Check Flight).

## Chapter II

### Ground Training

1. Ground Training Philosophy. Newly reporting IUTs must regain NATOPS-mandated currencies and become knowledgeable of their respective systems and flight preparation procedures.
2. Flight Support Training Philosophy. IUTs learn fundamentals and procedures of T-45C normal and emergency procedures and become knowledgeable of current standardization. The two primary methods of instruction are CAI and MIL. A CAI is a self-paced, computer-based instructional module. A MIL is a traditional lecture format, where an instructor teaches with the aid of electronic media.

Blk #	Media	Title	Events	Hrs	Blk Name
G01	Class	Administration/ Ground Training	6	10.0	See Below

1. Prerequisites

- a. G0101 prior to G0102 and G0104.
- b. G0102 prior to G0103.
- c. G0104 prior to G0105A, G0105B, G0105C, and G0105D.
- d. NA4690 prior to G0106.
- e. If required: G0204, G0205, NA3690 and NA4790 prior to G0106 (Pilot).
- f. If required: G0203-5 prior to G0106 (NFO).

2. Events

G0101	Admin	Administration/Check-In. IUTs will check in with the Wing/Squadron, Ground Training, Medical (Admin up-chit), and Flight Gear Support. This event includes Publications Issue, Curriculum Introduction, Safety, NATOPS and TIMS support.	4.0	ADMIN
G0102	Offline MIL	NACES Flight Physiology	1.0	SEAT
G0103	Offline MIL	Ejection Seat Lecture/NACES Preflight	1.0	SEAT
G0104	Offline MIL	Course Rules	1.0	CR

2. Events Cont

G0105A	CAI Test	CTW-2 Course Rules Exam	1.0	CR
G0105B	CAI Test	VT-7 Course Rules Exam	1.0	CR
G0105C	CAI Test	VT-9 Course Rules Exam	1.0	CR
G0105D	P/P Exam	CTW-6 Course Rules Exam	1.0	CR
G0106	Sqdn	Administration/Checkout. IUTs will check out with the Wing/Squadron (if required), NATOPS, Ground Training, Flight Gear Support, and TIMS Support).	2.0	ADMIN

3. Syllabus Notes. G0106 is required if follow on IUT training is accomplished at a different TRAWING. If follow on training is to continue at same location, G0106 may also be used to complete required NATOPS paperwork and move IUT into follow on syllabus in TIMS. Refer to local procedures for G0106 completion requirements.

4. Discuss Items. None.

Chapter III

NATOPS Training

1. Refresher Flight Training Philosophy. Allow IUT a chance to gain experience in the T-45C. Comply with T-45C NATOPS check-ride requirements.

2. Matrices. The following matrix is an overview of the entire NATOPS Stage. The purpose of this matrix is to provide the IUT and instructor the easiest way to track progress, regression, and overall status in relation to the MIF. In addition, there is a single matrix following each block description throughout this chapter.

3. NATOPS Stage MIF

Blk #	Media	Title	Events	Hrs	H/X
NA31	OFT	Cockpit Orientation/Familiarization /Emergency Procedures	3	4.5	1.5

1. Prerequisites

a. FAM1103A, FAM1103B, or FAM1103C (applicable FFP Exam) (Pilot).

b. NFM1102 (Night Emergency Procedures) (NFO).

2. Syllabus Notes

a. Pilot and NFO IUTs shall complete all events in this block.

b. NFO IUTs should attempt to fly these events to the maximum extent practicable.

c. Pilot IUTs shall execute all checklists and procedures IAW "single seat" mindset.

d. NFO IUTs shall execute NFO crew coordination checklists and procedures.

e. The IUT will perform the following procedures IAW FTI, NATOPS, and SOP on the indicated event:

NA3101

Canopy/ejection seat preflight, strap-in procedures, cockpit preflight checklist, prestart checklist, aircraft start, post-start checklist, cockpit display management, pre-taxi checklist, ground communications, taxi checklist, aircraft taxi, flight instrument checks, takeoff clearance, takeoff checklist, engine checks, takeoff, departure communications, 10,000-foot checks/15-minute report, enroute communications, descent/penetration checklist, approach control communications, VFR approach to pattern initial, landing checklist, VFR Landing Pattern, tower communications, FF Touch-and-Go, FF Roll-and-Go, Full-Stop Landing, after landing checklist, shutdown checklist, normal egress procedures.

**Malfunctions/EPs:** Abort, Engine Failure (seizure), NF Touch-and-Go, NF Roll-and-Go, Precautionary Approaches, Controlled Ejection, swerve after touchdown, landing rollout with blown tire.

NA3102

All normal checklists, full system utilization, VFR Landing Pattern, Precautionary Approaches (Straight-In/Abeam), Full-Stop Landing.

**Malfunctions/EPs:** Start malfunctions (no READY light, low oil pressure on start, bleed valve failure), Abnormal Start (wet start, hot start, hung start), ground emergency communications, Clear Engine Procedure, Emergency Shutdown/Egress, Tailpipe Fire After Shutdown, Engine Failure (takeoff, flameout), Assisted Airstart, Successful Airstart, EGT/RPM WARNING (engine overspeed), FIRE WARNING (engine fire on start, engine fire no secondary indications, engine fire with secondary indications), ACCEL Caution, TP HOT Caution, Precautionary Approach (Straight-In/Abeam).

NA3103

All normal checklists, area/MOA entry/exit, vertical recovery, aerobatic maneuvers, stall maneuvers, Unusual Attitude Recovery (VMC), VFR Landing Pattern, Crosswind Landings, Waveoff, No-HUD Landings, No Flap Landings, Precautionary Approach (Overhead Parallel/Perpendicular), Full-Stop Landing.

**Malfunctions/EPs:** Compressor Stall (High and Low Altitude), Failure to Relight, Incorrect or Uncommanded Engine Response, Vibrations, GTS FIRE WARNING, Hydraulic system malfunctions (HYD FAIL WARNING, HYD 1 EDP failure, HYD 2 EDP failure, HYD 1 and 2 failure RAT OK, total HYD failure, accumulator failure), gear emergency extend failure, OIL PRESS WARNING, ECA 2 Caution, RAT Caution (uncommanded RAT extension), Precautionary Approach (Overhead Parallel/Perpendicular), Half Flap Fly-In Arrestment, Half Flap Roll-In Arrestment.

3. Special Syllabus Requirements. None.

4. Discuss Items

NA3101

QOD, ground signals, READY Advisory, normal checklists.

NA3102

QOD, Start malfunctions, abnormal start indications.

NA3103

QOD, Stall Series, Overhead PA profiles.

Blk #	Media	Title	Events	Hrs	H/X
NA32	OFT	NATOPS Instrument	2	3.0	1.5

1. Prerequisite. NA3103.

2. Syllabus Notes

a. Pilot and NFO IUTs shall complete all events in this block.

b. NFO IUTs should attempt to fly these events to the maximum extent practicable.

c. Pilot IUTs shall execute all checklists and procedures IAW "single seat" mindset.

d. NFO IUTs shall execute NFO crew coordination checklists and procedures.

e. During this block, IUTs must fly at least the approaches listed below (approaches may be combined, e.g., a Low Oil PAR may be logged as a PAR and a Low Oil Approach):

TACAN/VOR DME	1 full panel
	1 partial panel
ILS	1 full panel
	1 partial panel
PAR	1 partial panel
No-Gyro GCA	1
Low Oil Approach	1
Min/Emergency Fuel Appr.	1

f. The IUT will perform the following procedures IAW FTI, NATOPS, and SOP on the indicated event:

NA3201 (Basic Instrument maneuvers)

All normal checklists, instrument takeoff, S-3 pattern, Unusual Attitude Recovery (IMC), instrument approaches, LOW OIL approach.

**Malfunctions/EPs:** SAHRS/GINA failure or erroneous data, DEU Degrade, DEU Failure, GINA Failure, SADS Degrade/Failure, MFD failure, Pitot Static Malfunction, Total Electrical Failure, Electrical Fire, Elimination of Smoke or Fumes from

Cockpit, GENERATOR WARNING, OXYGEN WARNING, AC INV Caution, engine fire on shutdown.

NA3202 (Instrument Navigation)

All normal checklists, instrument takeoff, point-to-point, non-system point-to-point, TACAN/VOR tracking, Unusual Attitude Recovery (IMC), instrument approaches, min/emergency fuel approach.

**Malfunctions/EPs:** ECS failure, AV HOT Caution, Excessive Fuel Flow/Suspected Fuel Leak, FUEL Caution, F PRES Caution, LP PUMP Caution, LP fuel pump failure, boost pump failure, initial shot failure, BINGO profile.

- 3. Special Syllabus Requirements. None.
- 4. Discuss Items

NA3201

QOD, DEU Overheat, CANOPY Caution, M FUEL Caution, ILS/LOCALIZER/POSITION/SIM MODE Advisories.

NA3202

QOD, Fogging of Windscreen/Fog in Crew Station, Cabin Temperature Failure, Hypoxia/OBOGS Contamination, Loss of Canopy, CABIN ALT WARNING.

Blk #	Media	Title	Events	Hrs	H/X
NA33	OFT	Out-of-Control Flight (OCF)	1	1.5	1.5

1. Prerequisites

- a. NA3103.
- b. OCF1102 (OCF Exam).

2. Syllabus Notes

a. NFO IUTs shall operate flight controls for this event to the maximum extent practicable.

b. Pilot IUTs shall execute all checklists and procedures IAW "single seat" mindset.

c. NFO IUTs shall execute NFO crew coordination checklists and procedures.

d. The IUT will perform the following procedures IAW FTI, NATOPS, and SOP on this event: all normal checklists, VFR Landing Pattern, NF Touch-and-Go, Vertical Recovery, departure maneuvers, PA to Full Stop. Two stuck throttle approaches are required (high and low).

**Malfunctions/EPs:** Engine stalls, Engine Vibration, Engine Seizure, Engine Flameout, Straight-In Stuck Throttle, Stuck Throttle Approach, Overhead Stuck Throttle, brake failure after touchdown, brake accumulator failure, Long Field Arrestment, Short Field Arrestment, Trim malfunctions (Trim Failure, Trim Runaway rudder/elevator/stabilator, Rudder Trim Hardover), Uncommanded Roll/Yaw, CONTR AUG failure, Jammed or Binding Flight Controls, Departure/Spin Procedure, Flaps/Slats Failure, speedbrake fails to retract, Controllability Check, landing with no NWS, Minimum speed rotation on roll-and-go, minimum rollout landing, Ground ejection scenario.

3. Special Syllabus Requirements. None.

4. Discuss Items. QOD, locked-in compressor stall, spin and spin recovery characteristics and indications, SLATS Caution, MISCOMPARE Advisory.

NA35	OFT	NATOPS EP/Simulator Training Check	1	1.5	1.5

1. Prerequisites

- a. NA3202, NA3301, and NA3401 (Pilot).
- b. NA3202 and NA3301 (NFO).

2. Syllabus Notes

a. If practicable, this event should be completed just prior to the NATOPS Check Flight.

b. NFO IUTs should attempt to fly this event to the maximum extent practicable.

c. Pilot IUTs shall execute all checklists and procedures IAW "single seat" mindset.

d. NFO IUTs shall execute NFO crew coordination checklists and procedures.

e. The IUT will perform the following procedures IAW FTI, NATOPS, and SOP on this event: all normal checklists, area/MOA entry/exit, vertical recovery, aerobatic maneuvers, stall maneuvers, Unusual Attitude Recovery (VMC), VFR Landing Pattern, NF Touch-and-Go, FF Roll-and-Go, NF Roll-and-Go, Precautionary Approach(es), miscellaneous ground and airborne emergency procedures.

**Malfunctions/EPs (minimum):** Abnormal start (hot, hung or wet), birdstrike, compressor stall, stuck throttle (90-94%), OIL PRESS WARNING (no seizure), blown tire on takeoff roll, HYD 1 and 2 failure with operable RAT, generator failure with no reset, FIRE WARNING, Ejection.

3. Special Syllabus Requirements. None.

4. Discuss Items. Any major aircraft system, any T-45 limitations, and any immediate action emergency procedures, Ejection criteria, Abort criteria, Egress procedures, unresponsive engine/stuck throttle.

NA36	OFT	NATOPS Instrument Check in Simulator	1	1.2	1.2

1. Prerequisites

a. NA4690.

b. G0201-3 (IGS, METRO Review, IGS Exam) are required for initial qualification.

2. Syllabus Notes

a. Pilot IUTs shall occupy the front cockpit and execute all checklists and procedures IAW "single seat" mindset.

b. If annual CRM flight evaluation is conducted in conjunction with the NATOPS Instrument Ratings Check Flight, it shall be noted in the remarks section of the OPNAVINST 3710/2 NATOPS Instrument Rating Request Form.

c. NFO IUTs do not complete this block.

3. Special Syllabus Requirements. None.

4. Discuss Items. 3710.7U instrument planning requirements and restrictions, and local IFR NORDO approach procedures.

5. Block MIF

Course Training Standards (CTS)

1. Purpose. These standards outline the tasks and proficiency required of IUTs in T-45C NATOPS IUT.
2. IUT Duties and Responsibilities
  - a. Plan or manage the overall mission as appropriate.
  - b. Ensure proper aircraft preflight inspection is completed and aircraft is properly equipped for the assigned mission.
  - c. Operate the aircraft or aircraft systems, as applicable, to accomplish the mission using sound judgment and airmanship.
3. General Standards
  - a. Achieve training standards to be NATOPS qualified in T-45C aircraft.
  - b. Unless otherwise specified, use **Basic Airwork/Basic Airwork Recognition (BAW/BAR)** standards for all items with altitude, airspeed, or heading parameters.
  - c. "Standard" equates to **Qualified (Q)/Good (G/4)**.
  - d. Momentary deviations outside CTS that do not compromise flight safety are acceptable if subsequent corrections are timely.
  - e. Procedural knowledge and application must comply with applicable directives and allow efficient mission accomplishment. If individual tasks require pre-mission planning, the standards from **Mission Planning** apply.
4. Execution. The MIF regulates IUT progression to meet required standards prior to phase completion. SIs shall evaluate IUT performance against standards.

5. Job Tasks. Specific performance and standards required are described as follows:

BEHAVIOR STATEMENT	STANDARDS
GRADED ITEM	
<ul style="list-style-type: none"> <li>● A brief description of the behavior, required action, and/or conditions.</li> </ul>	<ul style="list-style-type: none"> <li>● The specific standards for the action. May be read as "The Instructor Under Training..."</li> </ul>

6. Course Training Standards

BEHAVIOR STATEMENT	STANDARDS
1. General Knowledge/Procedures	
<ul style="list-style-type: none"> <li>● Demonstrate knowledge of aircraft systems, procedures, and associated directives and instructions.</li> </ul>	<ul style="list-style-type: none"> <li>● Demonstrates a thorough understanding of aircraft systems capabilities, aircraft directives, and local procedures.</li> <li>● Knowledgeable of local working area WRT boundaries, altitudes, and significant landmarks without reference to in-flight guide or charts.</li> <li>● Demonstrates ability to apply procedures from all applicable source guidance.</li> </ul>
2. Emergency Procedures	
<ul style="list-style-type: none"> <li>● Recognize system malfunction and/or emergency situation.</li> </ul>	<ul style="list-style-type: none"> <li>● Expeditiously analyzes situation and systems and recognizes malfunction or emergency situation.</li> <li>● Maintains control of aircraft while responding appropriately to malfunction/emergency.</li> <li>● Maneuvers aircraft smartly to prevent degradation of situation with respect to external factors such as weather, traffic, etc.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
2. Emergency Procedures (continued)	
<ul style="list-style-type: none"> <li>● Perform NATOPS immediate action emergency procedures.</li>   <li>● Perform NATOPS noncritical action emergency procedures to include: <ul style="list-style-type: none"> <li>▶ Analysis of hypothetical aircraft malfunctions.</li> <li>▶ Simulated precautionary approaches and actual no-flap landings performed in the aircraft.</li> <li>▶ Life support training, survival, and physiological training IAW NATOPS.</li> </ul> </li> <li>● Lost communications</li> </ul>	<ul style="list-style-type: none"> <li>● Verbally states emergency NATOPS immediate action items in sequence, from memory, without error.</li> <li>● Performs proper steps of emergency NATOPS immediate action items in sequence, from memory, without error.</li> <li>● Performs proper steps to a satisfactory conclusion, effectively using NATOPS PCL to troubleshoot or complete NATOPS procedures.</li> <li>● Incorporates effective CRM to secure additional assistance where applicable.</li> <li>● Maintains situational awareness WRT local area and airfields while troubleshooting systems/ responding appropriately to situation.</li> <li>● Successfully recovers aircraft to suitable airfield or recognizes extremis situation and initiates ejection within safe parameters.</li> <li>● Performs proper steps to a satisfactory conclusion, effectively using FIH to troubleshoot or complete lost communication procedures.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
3. Headwork/Situational Awareness	
<ul style="list-style-type: none"> <li>● Assess self and aircraft in relation to the dynamic environment of flight, threats, and mission forecast; then execute tasks based on this assessment.</li>   <li>● Utilize CRM.</li> </ul>	<ul style="list-style-type: none"> <li>● Understands instructions, demonstrations, and explanations.</li> <li>● Remains alert and spatially oriented.</li> <li>● Correctly interprets in-flight events and applies strategies to proactively address them.</li> <li>● Recognizes and avoids channelized attention.</li> <li>● Effectively utilizes seven key skills of CRM throughout all portions of flight training.</li> </ul>
4. Basic Airwork	
<ul style="list-style-type: none"> <li>● Perform general aircraft control and composite/instrument cross-check as appropriate.</li>   <li>● Perform general aircraft control and composite/instrument cross-check in a partial panel situation.</li> </ul>	<ul style="list-style-type: none"> <li>● Maintains smooth positive aircraft control at all times.</li> <li>● Ensures momentary deviations, ±5 seconds, do not exceed: <ul style="list-style-type: none"> <li>▶ Airspeed: ±5 percent.</li> <li>▶ Altitude: ±100 feet.</li> <li>▶ Heading: ±5 degrees.</li> <li>▶ Course: ±1 dot/½ scale.</li> <li>▶ AOA: ±1 unit.</li> </ul> </li> <li>● Avoids hazards (ground obstructions, terrain, other aircraft, and severe weather).</li> <li>● Smoothly transitions to/from partial panel instrument scan as situation dictates.</li> <li>● Maintains course, altitude, and glideslope with minor deviations and appropriate error corrections for entirety of approach.</li> <li>● Deviations do not jeopardize safety of flight.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
4. Basic Airwork (continued)	
<ul style="list-style-type: none"> <li>▶ Partial Panel Airwork</li> </ul>	<ul style="list-style-type: none"> <li>● Maintains positive control of the aircraft at all times with a smooth transition from full panel to partial panel scan.</li> <li>● Ensures momentary deviations <math>\pm 5</math> seconds, do not exceed:               <ul style="list-style-type: none"> <li>▶ Airspeed: <math>\pm 15</math> knots.</li> <li>▶ Altitude: <math>\pm 150</math> feet.</li> <li>▶ Heading: <math>\pm 10</math> degrees.</li> <li>▶ Course: <math>\pm 2</math> NM.</li> <li>▶ AOA: <math>\pm 1</math> unit.</li> </ul> </li> <li>● Deviations do not jeopardize safety of flight.</li> </ul>
5. Mission Planning/Briefing/Debriefing	
<ul style="list-style-type: none"> <li>● Perform appropriate mission planning to include route selection, weather, NOTAMS, fuel optimization, computing takeoff, climb, enroute, descent, approach, and landing data: planning mission profile and alternate course of action where appropriate.</li> <li>● Attend/conduct pre- and post-mission briefing/debriefing for simulator or aircraft event.</li> </ul>	<ul style="list-style-type: none"> <li>● Plans mission in a timely manner to meet training objectives, complete all applicable Navy and command forms correctly, and complies with all directives.</li> <li>● Applies OPNAVINST 3710.7U filing and approach criterion to planning and execution of flight.</li> <li>● Aware of alternatives available, if flight cannot be completed as planned.</li> <li>● Briefs IAW NATOPS and command directives.</li> <li>● Asks questions, if necessary, to fully understand the mission overview and mission objectives, including ORM.</li> <li>● Clearly presents all information requested during briefing/debriefing.</li> <li>● Understands all CRM objectives and expectations for the mission.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
7. Ground Operations	
<ul style="list-style-type: none"> <li>● Inspect and wear appropriate flight equipment.</li> <li>● Perform exterior inspection, prestart and pretaxi checks to adhere to takeoff times within published tolerances.</li>   <li>● Coordinate checks with other aircrew for formation flight.</li> <li>● Perform taxi to/from runway.</li>   <li>● Complete "Instrument," "Before Takeoff," and "After Landing" checklists.</li> <li>● Perform the engine shutdown checklist.</li> <li>● Perform postflight inspection and administrative duties.</li> </ul>	<ul style="list-style-type: none"> <li>● Complies with NATOPS and command directives.</li>   <li>● Determines aircraft status and accepts or rejects aircraft based on NATOPS/command directives.</li> <li>● Completes required checks correctly.</li> <li>● Complies with NATOPS procedures and standardization tolerances.</li> <li>● Ensures clearance of line personnel, ground equipment, and other aircraft using appropriate signals prior to activation of aircraft systems.</li> <li>● Performs all checks, to include formation flight procedures IAW applicable directives.</li> <li>● Taxies at speeds commensurate with traffic and surface conditions, following prescribed route and giving way to other aircraft as appropriate.</li> <li>● Avoids hazards and ground obstructions.</li> <li>● Completes IAW NATOPS procedures.</li>   <li>● Completes IAW NATOPS procedures.</li>   <li>● Completes all postflight checks and administrative duties IAW NATOPS and applicable directives.</li> <li>● Thoroughly debriefs Maintenance Control on any aircraft discrepancies and ensures appropriate MAF filed.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
8. Flight Admin	
<ul style="list-style-type: none"> <li>● Perform in-flight planning and administrative functions, to include:               <ul style="list-style-type: none"> <li>▶ General.</li> <li>▶ Local course rules.</li> <li>▶ Area management.</li> <li>▶ Task management.</li> <li>▶ Fuel management.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>● Adjusts mission profile to comply with time/fuel limitations, as well as weather and area limits.</li> <li>● Complies with established routes, altitudes, and procedures for operating in local airspace environment.</li> <li>● Uses assigned airspace in an efficient manner with minimum delay between maneuvers.</li> <li>● Remains within area boundaries with or without ground references.</li> <li>● Prioritizes and accomplishes tasks in order of importance as it pertains to flight and mission accomplishment.</li> <li>● Properly utilizes mission cross-check time based on terrain/task load/personal performance.</li> <li>● Actively monitors fuel state throughout the mission.</li> <li>● Complies with all established fuel requirements.</li> <li>● Recognizes Joker or Bingo fuel within ±100 pounds of briefed quantity and makes timely call to IP/lead.</li> <li>● Regulates flight profile, throttle, and configuration to optimize fuel consumption as appropriate for the mission profile and training objectives.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
8. Flight Admin (continued)	
<ul style="list-style-type: none"> <li>▶ Weather planning.</li> <li>▶ In-flight checks.</li> <li>▶ Route/destination change.</li> </ul>	<ul style="list-style-type: none"> <li>● Recognizes and applies OPNAV/FLIP weather minima required for selected type of approach to field.</li> <li>● Completes all checklist items correctly and at proper point in mission, to include checking over other aircraft in the flight, IAW applicable directives.</li> <li>● Properly coordinates flight plan change through appropriate FSS or ATC facility using a DRAFT report or the IFR Supplement Change of Flight Plan formatting.</li> <li>● If necessary, obtains new weather report along route of flight and at destination field.</li> <li>● Calculates new fuel requirements along with time of flight.</li> </ul>
9. Takeoff	
<ul style="list-style-type: none"> <li>● Perform individual takeoff to include: <ul style="list-style-type: none"> <li>▶ Runup check.</li> <li>▶ Linespeed check.</li> <li>▶ Retracting gear/flaps.</li> <li>▶ Accelerating to climb airspeed.</li> </ul> </li> <li>● Transition to instruments as required.</li> </ul>	<ul style="list-style-type: none"> <li>● Maintains position during engine runup for static takeoff.</li> <li>● Maintains runway centerline ±5 feet during takeoff.</li> <li>● Rotates within -0 to +10 knots of computed rotation speed and maintains desired pitch attitude ±2 degrees.</li> <li>● Establishes and maintains proper takeoff attitude at appropriate airspeed for existing conditions.</li> <li>● Initiates gear and flap retraction when safely airborne and ensures fully retracted prior to exceeding 200 KIAS.</li> <li>● Properly transitions to flight instruments as required for actual or simulated weather conditions.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
10. Departure/Rendezvous	
<ul style="list-style-type: none"> <li>● Safely maneuver aircraft out of airfield environment.               <ul style="list-style-type: none"> <li>▶ IFR.</li> <li>▶ VFR.</li> </ul> </li>   <li>● Interval departure/ rendezvous.</li> </ul>	<ul style="list-style-type: none"> <li>● Performs departure as published or directed.</li> <li>● Complies with all restrictions.</li> <li>● Achieves and maintains target climb schedule airspeeds ±10 KIAS or 0.02 Mach at target altitudes ±1,000 feet.</li> <li>● Initiates level-off at desired altitude using the 10-percent rule.</li> <li>● Promptly establishes cruise airspeed.</li> <li>● Accomplishes using proper procedures and techniques per Formation FTI.</li> </ul>
11. Enroute Navigation	
<ul style="list-style-type: none"> <li>● Perform enroute navigation to include:               <ul style="list-style-type: none"> <li>▶ Climbs/Descents</li>   <li>▶ Intercept/maintain course - perform VOR or TACAN course intercepts inbound, outbound, or immediately after station passage, and maintain VOR or TACAN course.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>● Complies with basic airwork standards.</li> <li>● Compensates for known wind drift as required.</li> <li>● Maintains target airspeed ±10 knots.</li> <li>● Levels off at desired altitude ±100 feet using 10-percent rule.</li> <li>● Complies with all restrictions.</li> <li>● Establishes a valid intercept.</li> <li>● Maintains course ±5 degrees/ 1 dot/½ scale.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
11. Enroute Navigation (continued)	
<ul style="list-style-type: none"> <li>▶ STAR - Perform standard arrival (STAR) procedure IAW FLIP publication.</li> </ul>	<ul style="list-style-type: none"> <li>● Establishes valid course intercepts and maintains courses 1 dot/½ scale/±5 degrees.</li> <li>● Establishes valid arc/radial intercepts and maintains arcs ±0.5 mile.</li> <li>● Meets all altitude/airspeed restrictions.</li> </ul>
12. Descent/Field Entry	
<ul style="list-style-type: none"> <li>● Perform a descent and traffic entry, to include:               <ul style="list-style-type: none"> <li>▶ Climbs/descents enroute descent.</li> <li>▶ Climbs/descents max range descent.</li> <li>▶ Climbs/descents field break.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>● Executes as published or directed.</li> <li>● Complies with all restrictions and directives.</li> <li>● Analyzes internal and external factors to select most effective method of descent (enroute or max range).</li> <li>● Utilizes RADALT effectively to observe platform and subsequent altitude restrictions.</li> <li>● Observes "minute to live" rule (unless scenario or circumstances specifically dictate otherwise).</li> <li>● Establishes proper interval for pattern entry.</li> <li>● Maintains break altitude ±100 feet until established on downwind.</li> <li>● Configures in adequate time to perform landing and AOA/airspeed checks prior to approach turn 90-degree position.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
13. Holding	
<ul style="list-style-type: none"> <li>● Perform high- and low-altitude VOR/TACAN holding as described by controller or IAW FLIP document.</li> </ul>	<ul style="list-style-type: none"> <li>● Performs published/standard entry procedures and maintains designated pattern IAW Instrument NATOPS and FTI.</li> <li>● Complies with holding pattern limits: <ul style="list-style-type: none"> <li>▶ Uses proper voice procedures.</li> <li>▶ Maintains holding airspeed ±5 KIAS.</li> </ul> </li> </ul>
14. High Altitude Penetration	
<ul style="list-style-type: none"> <li>● Perform a VOR, VOR/DME, or TACAN penetration (arc/radial intercept) from IAF to FAF, as published in FLIP document or local procedures.</li> </ul>	<ul style="list-style-type: none"> <li>● Complies with published penetration course, arc, and altitudes.</li> <li>● Complies with basic airwork standards.</li> <li>● Establishes valid intercepts.</li> <li>● Maintains course ±5 degrees/ 1 dot/½ scale.</li> <li>● Establishes valid arc/radial intercepts.</li> <li>● Maintains arcs ±0.5 NM.</li> </ul>
15. Precision Approach	
<ul style="list-style-type: none"> <li>● Perform precision approaches as published in FLIP document or local procedures, to include: <ul style="list-style-type: none"> <li>▶ ILS approach.</li> <li>▶ PAR approach. <ul style="list-style-type: none"> <li>▪ Normal PAR.</li> <li>▪ No-Gyro PAR.</li> <li>▪ Partial panel.</li> </ul> </li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>● Complies with published approach and NATOPS procedures.</li> <li>● Maintains target AOA or final approach airspeed ±1 unit AOA or ±5 KIAS during final descent.</li> <li>● Arrives at DA in position to maintain a normal visual glidepath to the runway and land safely.</li> <li>● Maintains CDI and GSI within 1 dot/½ scale deflection.</li> <li>● Maintains ±3 degrees of assigned heading (except gyro out) and does not achieve multiple "well above" or "well below" glidepath calls.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
15. Precision Approach (continued)	
<ul style="list-style-type: none"> <li>▶ Transition from one-half flap approach setting to full flaps for landing.</li> </ul>	<ul style="list-style-type: none"> <li>● Prior to DA, configures to full flaps and reviews landing checks complete to confirm the configuration change.</li> <li>● Recalculates and slows to the new full-flap target AOA or airspeed <math>\pm 1</math> unit AOA or <math>\pm 5</math> KIAS while maintaining appropriate glideslope to touchdown.</li> </ul>
16. Non-Precision Approach	
<ul style="list-style-type: none"> <li>● Perform non-precision, full panel, partial panel, or no-gyro approaches as published in FLIP document or local procedures, to include:           <ul style="list-style-type: none"> <li>▶ Localizer approach or BC localizer.</li> <li>▶ TACAN or VOR/DME approach.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>● Complies with published approach and NATOPS procedures.</li> <li>● Arrives at and maintains MDA <math>-0/+100</math> feet at or prior to VDP.</li> <li>● Arrives in position to maintain a normal visual glidepath to the runway and land safely.</li> <li>● Begins timing within 5 seconds, if appropriate.</li> <li>● Maintains target AOA or final approach airspeed <math>\pm 1</math> unit AOA or <math>\pm 5</math> KIAS after FAF.</li> <li>● Maintains CDI within 1 dot/<math>\frac{1}{2}</math> scale deflection.</li> <li>● Maintains target AOA or final approach airspeed <math>\pm 1</math> unit AOA or <math>\pm 5</math> KIAS after FAF.</li> <li>● Maintains final approach course <math>\pm 1</math> dot/<math>\frac{1}{2}</math> scale/5 degrees.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
17. Circling Approach/Maneuver	
<ul style="list-style-type: none"> <li>● Perform a circling approach and maneuver as published in FLIP document or local procedures.</li> </ul>	<ul style="list-style-type: none"> <li>● Accomplishes IAW Instrument FTI and Instrument NATOPS.</li> <li>● Prior to circling maneuver, maintains course and altitude IAW non-precision approach standards.</li> <li>● During maneuver, maintains circling MDA -0 feet, and maintains visual reference to the airport until acquiring visual glidepath.</li> <li>● Positions aircraft for a safe landing.</li> <li>● Once visual reference with the runway environment is acquired, appropriately transitions from an instrument scan to a visual scan while beginning the circling maneuver as published, as instructed by ATC, or in an appropriate manner to safely and efficiently execute the maneuver.</li> <li>● Remains within the clear zone for the approach category.</li> <li>● If required, executes appropriate missed approach instructions for the approach flown.</li> <li>● Executes circling maneuver on the appropriate side of the airfield.</li> </ul>
18. Missed Approach	
<ul style="list-style-type: none"> <li>● Perform a missed approach and partial panel missed approach.</li> <li>● Perform climbout for additional approaches.</li> </ul>	<ul style="list-style-type: none"> <li>● Complies with FLIP document and ATC instructions for missed approach or climbout instructions.</li> <li>● Completes IAW Instrument FTI and Instrument NATOPS.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
19. Precautionary Approach	
<ul style="list-style-type: none"> <li>● Perform precautionary approach IAW NATOPS, FTI and local SOP/course rules, to include:               <ul style="list-style-type: none"> <li>▶ Overhead.</li> <li>▶ Abeam.</li> <li>▶ Straight-In.</li> </ul> </li>   <li>● Performs precautionary instrument approach IAW NATOPS, FTI and local SOP/course rules, to include:               <ul style="list-style-type: none"> <li>▶ Low oil approach.</li> <li>▶ Min/emer fuel approach.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>● Properly coordinates maneuver with ATC.</li> <li>● Effectively manages airspace for entry, including appropriate voice reports.</li> <li>● Effectively manages energy state via configuration and maintains profile without manipulation of throttle.</li> <li>● Utilizes target airspeed and altitude checkpoints (<math>\pm 15</math> knots, <math>+300/-200</math> feet) to effectively maintain profile.</li> <li>● Manages flare adequately to touch down in first third of runway or prior to A-gear if required.</li> <li>● Safely achieves flight with flying airspeed, mil power, and speedbrakes retracted during touch-and-go.</li> <li>● Properly coordinates maneuver with ATC.</li> <li>● Effectively manages energy state via configuration to maintain adequate approach profile.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
21. Landing/Touch-and-Go	
<ul style="list-style-type: none"> <li>● (Start to touchdown)            Perform touch-and-go or full-stop landing to include the following:           <ul style="list-style-type: none"> <li>▶ Touch-and-go.               <ul style="list-style-type: none"> <li>▪ Full-flap.</li> <li>▪ Half-flap.</li> <li>▪ No-flap.</li> <li>▪ Crosswind.</li> </ul> </li> <li>▶ FCLP-type landing (FLOLS/IFLOLS).</li> </ul> </li> <li>▶ Roll-and-go.               <ul style="list-style-type: none"> <li>▪ Full-flap.</li> <li>▪ Half-flap (simulated short-field arrestment).</li> <li>▪ No-flap.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>● References optical landing system, if available, to achieve safe approach glideslope.</li> <li>● Touches down at proper pitch attitude, maintains proper ground track, uses crosswind controls as required.</li> <li>● Touches down in prescribed landing zone IAW NATOPS and local procedures.</li> <li>● Touches down with no greater than -600 fpm rate of descent for flap configurations other than full.</li> <li>● Performs graded touch-and-go or full-stop landing utilizing FLOLS/IFLOLS lens.</li> <li>● Adequately manages energy state during wings-level transition to maintain reasonable VSI, AOA, and lineup control.</li> <li>● Makes timely and appropriate corrections to maintain or correct back to optimum glideslope, AOA, and lineup.</li> <li>● Applies crosswind corrections adequately to maintain centerline both on final and during/after touchdown.</li> <li>● Consistently touches down with a stable, centered-to-high ball, on-speed, and on centerline.</li> <li>● Maintains runway alignment using aileron, rudder, and nosewheel steering to track down runway.</li> <li>● Recognizes groundspeed checkpoints and executes go-around at target airspeed <math>\pm 5</math> KIAS/<math>\pm 200</math> feet of target runway remaining.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
23. Basic Instrument Maneuvers	
<ul style="list-style-type: none"> <li>● Perform instrument training maneuvers as described in Instrument FTI or as directed, full or partial panel, to include:               <ul style="list-style-type: none"> <li>▶ Climbs/descents.</li> <li>▶ Level speed changes.</li> <li>▶ Timed turns.</li> <li>▶ Turn pattern.</li> <li>▶ Vertical S maneuvers:                   <ul style="list-style-type: none"> <li>▪ S-1 pattern.</li> <li>▪ S-3 pattern.</li> </ul> </li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>● Effectively utilizes power to maintain airspeed <math>\pm 10</math> knots.</li> <li>● Maintains target VSI <math>\pm 200</math> fpm.</li> <li>● Levels off at desired altitude <math>\pm 100</math> feet using 10-percent rule.</li> <li>● Maintains altitude <math>\pm 100</math> feet.</li> <li>● Achieves and maintains target airspeed <math>\pm 5</math> knots.</li> <li>● Maintains standard or one-half standard turn rate to achieve desired heading change in appropriate time period, <math>\pm 5</math> seconds.</li> <li>● Uses indicated airspeed to appropriately determine AOB.</li> <li>● Monitors turn needle and adjusts AOB as required to maintain standard or one-half standard turn rate.</li> <li>● Effectively utilizes power to maintain airspeed <math>\pm 5</math> knots.</li> <li>● Maintains altitude <math>\pm 100</math> feet.</li> <li>● Performs turn reversals at target heading <math>\pm 5</math> degrees.</li> <li>● Maintains VSI <math>\pm 200</math> fpm.</li> <li>● Maintains <math>\pm 5</math> KIAS of desired airspeed.</li> <li>● Maintains AOB <math>\pm 5</math> degrees.</li> <li>● Reverses direction or level off <math>\pm 100</math> feet of desired altitude.</li> <li>● Maintains timing <math>\pm 5</math> seconds.</li> <li>● Makes timely and appropriate corrections for deviations.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
23. Basic Instrument Maneuvers (continued)	
<ul style="list-style-type: none"> <li>▶ Slow flight maneuver.</li> </ul>	<ul style="list-style-type: none"> <li>● Reconfigures aircraft at appropriate airspeed, maintaining <math>\pm 100</math> feet of target altitude.</li> <li>● Maintains target airspeed <math>\pm 5</math> knots or on-speed AOA <math>\pm 2</math> units once established.</li> <li>● Establishes target ROD <math>\pm 200</math> fpm.</li> </ul>
24. Familiarization Maneuvers	
<ul style="list-style-type: none"> <li>● Perform familiarization maneuvers as described in the FTI or as directed, to include:               <ul style="list-style-type: none"> <li>▶ Vertical recovery.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>● Executes IAW FAM FTI descriptions, to include:               <ul style="list-style-type: none"> <li>▶ Attains stabilized target entry airspeed <math>\pm 5</math> knots.</li> <li>▶ Smoothly applies back stick to achieve 17 units without entering pitch-buck.</li> <li>▶ Elevates nose to and maintains attitude at 60 degrees (<math>\pm 3</math> degrees) until recovery.</li> <li>▶ Initiates recovery at target airspeed <math>\pm 5</math> knots.</li> <li>▶ Begins maneuver with sufficient altitude excess to complete maneuver.</li> </ul> </li> </ul>

BEHAVIOR STATEMENT	STANDARDS
24. Familiarization Maneuvers (continued)	
<ul style="list-style-type: none"> <li>▶ Minimum radius turn.</li> </ul>	<ul style="list-style-type: none"> <li>● Executes IAW FAM FTI descriptions, to include:               <ul style="list-style-type: none"> <li>▶ Attains stabilized target entry airspeed <math>\pm 5</math> knots.</li> <li>▶ Smoothly applies back stick to achieve 17 <math>\pm 1</math> unit.</li> <li>▶ Maintains <math>\pm 5</math> knots throughout maneuver.</li> <li>▶ Prevents excessive nose "ballooning" during reversals (100-foot maximum).</li> <li>▶ Completes reversal and final rollout <math>\pm 5</math> degrees of target heading.</li> <li>▶ Begins maneuver with sufficient altitude excess to complete maneuver.</li> </ul> </li> </ul>
25. Aerobatics	
<ul style="list-style-type: none"> <li>● Perform instrument aerobatic maneuvers IAW Instrument FTI, to include:               <ul style="list-style-type: none"> <li>▶ Aileron roll.</li> <li>▶ Wingover.</li> <li>▶ Barrel roll.</li> <li>▶ Loop.</li> <li>▶ One-half Cuban eight.</li> <li>▶ Immelmann.</li> <li>▶ Split-S.</li> </ul> </li> <li>● Perform maneuvers listed above in visual environment IAW Familiarization FTI. In addition, perform squirrel cage.</li> </ul>	<ul style="list-style-type: none"> <li>● Verbalizes and attains target entry parameters (<math>\pm 5</math> knots, <math>\pm 100</math> feet) prior to beginning the maneuver.</li> <li>● Flies in a smooth, positive, and coordinated manner.</li> <li>● Achieves and maintains target g load <math>\pm 1</math> g and AOA <math>\pm 2</math> units during overhead maneuvers.</li> <li>● Executes rolling maneuvers at target attitude <math>\pm 5</math> degrees.</li> <li>● Exits maneuver at original entry parameters <math>\pm 200</math> feet, <math>\pm 10</math> knots, <math>\pm 10</math> degrees.</li> <li>● Plans maneuver entries to remain within area boundaries.</li> <li>● Ensures primary emphasis during aerobatic maneuvers is on use of outside references.</li> <li>● Efficiently links series of maneuvers.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
26. Unusual Attitude Recoveries	
<ul style="list-style-type: none"> <li>● Perform recoveries IAW appropriate FTI for:               <ul style="list-style-type: none"> <li>▶ Nose-high recovery.</li>   <li>▶ Nose-low recovery.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>● Uses correct instrument flight references throughout recoveries.</li> <li>● Recovers to level flight expeditiously without stalling or exceeding aircraft limitations.</li> <li>● Recovers to level flight without excessive altitude loss, stall, or exceeding aircraft limitations.</li> <li>● Recovery is complete when the descent is stopped.</li> </ul>
27. Stall/OCF Recognition and Recovery	
<ul style="list-style-type: none"> <li>● Perform approaches to stall, full stalls, and recoveries IAW FTI, to include the following:               <ul style="list-style-type: none"> <li>▶ Power-off stall.</li> <li>▶ Break turn stall.</li> <li>▶ Landing attitude maneuver.</li> <li>▶ Landing attitude stall.</li> <li>▶ Approach turn stall.</li> <li>▶ Accelerated stall.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>● Effectively trims aircraft for level flight/on-speed prior to commencing maneuver.</li> <li>● Maintains altitude <math>\pm 100</math> feet and VSI <math>0 \pm 200</math> fpm prior to stall.</li> <li>● Recognizes approach-to-stall indications and recovers IAW NATOPS and FTI procedures, with no loss of altitude (recovery complete when two positive rates of climb established).</li> <li>● Recognizes full-stall indications and recovers IAW NATOPS and FTI procedures with minimum loss of altitude <math>\leq 500</math> feet (recovery complete when two positive rates of climb established).</li> <li>● Prevents entry into secondary stall; recognizes secondary stall, if entered, and recovers properly.</li> <li>● Does not exceed gear/flap limitation airspeeds.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
27. Stall/OCF Recognition and Recovery (continued)	
<ul style="list-style-type: none"> <li>● Performs OCF maneuvers IAW FTI, to include:               <ul style="list-style-type: none"> <li>▶ High AOA/deep stall investigation.</li> <li>▶ 70-/90-/110-degree departures.</li> <li>▶ Lateral stick adverse yaw departure.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>● Demonstrates in-depth knowledge of NATOPS OCF procedures and prohibited maneuvers.</li> <li>● Correctly enters prescribed syllabus maneuvers per OCF FTI.</li> <li>● Correctly applies recovery control inputs and procedures per OCF FTI.</li> </ul>
28. Formation Takeoff	
<ul style="list-style-type: none"> <li>● Perform two- and four-ship takeoffs as Wing IAW Formation FTI, to include:               <ul style="list-style-type: none"> <li>▶ Section takeoff.</li> <li>▶ Interval takeoff.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>● Positions aircraft in appropriate lane of runway <math>\pm 3</math> feet, on appropriate bearing line or "banana echelon."</li> <li>● Achieves target interval <math>\pm 1</math> second for brake release.</li> <li>● Maintains appropriate lane of runway <math>\pm 5</math> feet during takeoff roll.</li> <li>● Lifts off no earlier than lead and maintains <math>\pm 15</math> degrees of parade bearing.</li> <li>● Configures on lead's signal, making smooth, positive control inputs; signals clean at appropriate time.</li> <li>● Smoothly and expeditiously accelerates to appropriate rendezvous speed.</li> <li>● Initiates cross to inside of expected turn within 5 seconds of aircraft clean, but not before interval.</li> <li>● Upon reaching target airspeed, expeditiously puts lead/interval on the horizon.</li> <li>● Accomplishes timely rendezvous maintaining lead on horizon, IAW CV or running rendezvous standards.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
29. Formation Lead	
<ul style="list-style-type: none"> <li>● Perform two-ship formation as Lead IAW Formation FTI, to include: <ul style="list-style-type: none"> <li>▶ Departure.</li> <li>▶ Parade.</li> <li>▶ Lead change.</li> <li>▶ Breakup and rendezvous.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>● Complies with Formation FTI and course rules, considering airspace and weather to plan maneuvers.</li> <li>● Completes profile in a smooth manner without exceeding wingman's capabilities and without degrading flight safety.</li> <li>● Maintains a smooth, stable platform, avoiding abrupt power changes and maintaining &gt;80 percent rpm while monitoring -2.</li> <li>● Utilizes proper communications and signals as lead.</li> <li>● Maintains visual awareness of wingman.</li> <li>● Monitors wingman during initial joinup.</li> <li>● Communicates with ATC to effect joinup as necessary.</li> <li>● Accomplishes parade maneuvering up to 2 Gs and 45 degrees of bank.</li> <li>● Passes lead utilizing appropriate visual/voice/light signals.</li> <li>● Positively maneuvers aircraft to establish wingtip separation -0/+10 feet and step-down ±5 feet, and no further aft than cruise bearing line IAW FTI.</li> <li>● Provides stable platform within BAW tolerances.</li> </ul>

BEHAVIOR STATEMENT	STANDARDS
30. Formation Wing (continued)	
<p>▶ Cruise over-the-top.</p> <p>▶ Breakup for rendezvous.</p> <p>▶ CV rendezvous.</p>	<ul style="list-style-type: none"> <li>● Maintains appropriate lane during reversals.</li> <li>● Smoothly and positively corrects back to position within 5 seconds without prompting from IP.</li> <li>● Smoothly enters over-the-top maneuver from a standard cruise position and maintains a relatively steady position throughout.</li> <li>● Makes appropriate corrections with throttle, AOB, and pitch attitude as required.</li> <li>● Maintains target airspeed <math>\pm 5</math> knots during breakup turn and while in trail.</li> <li>● Rolls out 1,000 <math>\pm 200</math> feet in trail of lead/interval.</li> <li>● Maintains visual situational awareness to all aircraft ahead, with safe separation from interval.</li> <li>● Expeditiously maneuvers to bearing line.</li> <li>● Maintains a stable plane-of-motion, co-altitude with lead/interval.</li> <li>● Recognizes and makes corrections without prompting to deviations in bearing line, fuselage alignment, and airspeed control while maintaining positive closure.</li> <li>● Controls closure at the in-close position to effect smooth crossunder to echelon.</li> </ul>

Master Materials List

1. Individually Issued Materials

	TITLE	IDENTIFICATION	QTY PER STUDENT
a.	T-45C NATOPS IUT Curriculum	CNATRAINST 1542.169	1
b.	Flight Training Instructions (FTI)	CNATRA PAT PUB P-1204 through P-1289 as applicable	9
c.	DOD FLIP Publications		
	(1) Enroute IFR Supplement U.S.		3
	(2) Enroute High Altitude Chart		6
	(3) Terminal High Altitude Instrument Approach Procedures		6
d.	TRAWING In-Flight Guide	Locally produced/issued	1
e.	Aviation Training Jacket	CNATRA-GEN 1542/10A	1
f.	Pilot Training Summary	CNATRA 1542/95	1
g.	Jacket Review	CNATRA-GEN 1542/66	1
